

Aura announce launch of new digital finisher

By Noel D'cunha

Aura Papers has announced the availability of digital finisher- DF 360, MGI's multi-functioning paper finishing unit.

According to Aura, it's the first offline finishing unit with integrated lamination capabilities and in-line multi-function finishing (horizontal and vertical cutting, creasing slitting and scoring) in just one pass and "is the

perfect complement to sheet-fed digital or offset presses" which will automate and speeds up many traditional finishing processes.

P Natarajan, managing director at Aura Papers, said: "We are sure this innovative product will help printers overcome bottlenecks in their finishing department which will help them concentrate more on adding value to the printing jobs."

DF 360: will complement digital and offset presses
