## **MGI, Konica Minolta and Wilson Present the JETvarnish 3D Series at CHINA PRINT 17**

*New Array of Digital Print Enhancement Solutions with Intelligent “Scan & Go” Registration Technology Being Demonstrated at Asian Graphic Arts Exposition*

*JETvarnish 3D Evolution with Sheet Feeder & Pallet Stacker*

China is the birthplace of ancient printing methods such as carved wood block and silk screen techniques. Those traditional processes have evolved over the centuries and now thousands of printers from around the world are visiting Beijing to learn about the latest industry advancements at [China Print 2017](#). MGI, its global business partner [Konica Minolta](#) and leading Asian distributor [Wilson Holdings Group](#) are presenting a visionary window into the “Future of Print” at Booths # E2-101/E2-102 with the [JETvarnish 3D](#), [JETvarnish 3D Evolution](#) and [JETvarnish 3DS](#) digital enhancement presses.

### ***The Dynamics of Digital Dimensionality***

The MGI JETvarnish 3D Series currently consists of 6 different product versions for both sheet-fed and roll-fed print embellishments. Each model produces variable 2D/3D UV textures and embossed foiling on a wide variety of applications and substrates, including paper, plastic and synthetic material. All JETvarnish 3D systems utilize 100% digital technology to produce eye-catching special effects. No expensive, time-consuming creation of dies or screens is needed. The patented MGI [AIS SmartScanner](#) intelligent registration module automatically manages digital, offset & flexo print output by adjusting inkjet varnish controls for each piece.

### ***The JETvarnish 3D Competitive Differential***

The JETvarnish 3D Series has won more worldwide printing awards than any other postpress finishing product line. The value of enriching print with dimensionality and metallic foil is to bring prints, packages and labels to life with both noteworthy visual decoration and compelling physical significance. The result is a more meaningful, memorable printing impression on customers and transfer of information to users. For brand owners and print buyers, that translates into more successful corporate communications, advertising campaigns and new product sales. For printers, it means more profitable job projects and client relationships.

### ***JETvarnish 3D Products at China Print 17***

- JETvarnish 3D Evolution: Expandable sheet options up to 29x47"/75x120cm at 3,300 B2s per hour
- JETvarnish 3D: Sheet sizes up to 20x42"/52x105cm with speeds up to 3,000 B2 sheets per hour
- JETvarnish 3DS: Sheet sizes up to 14x40"/36x102cm with speeds up to 3,000 A4 sheets per hour
